

## Procion MX Dyes

Procion dyes are the most popular dyes used in the textile art & craft market. They are used extensively throughout Australia, Europe & the US. These dyes are bright, strong colours that have very high reactivity making them suitable dyebath at low temperature (20-30°C) as well as printing and hand painting. They are both versatile and economical and exhibit good fastness properties. There are lots of books and reference material available using Procion dyes.

All colours are intermixable. **RED** denotes primary colours. \* Deep Black RGB not recommended as mixing colour.

				
Yellow MX8G	Yellow MX4G	Gold Yellow MXR	Yellow Ochre	Yellow MX3R
